

GANESH KAMBLI

Pune, Maharashtra | gkambli70@gmail.com | +91 88500 83095 | linkedin.com/in/ganeshkambli | github.com/Ganesh-403

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering <i>Savitribai Phule Pune University, Pune</i> CGPA: 8.65 / 10	2022 – 2026
HSC – Science (Class XII) <i>Gurukul Grand Union High School & Jr. College</i> Percentage: 74%	2020 – 2021

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, SQL
Web Technologies: HTML, CSS, REST APIs
Backend: FastAPI, Flask, async programming
Databases: MySQL, MongoDB, ChromaDB (vector), PostgreSQL, pgvector
Cloud / DevOps: AWS (EC2, S3, Lambda, RDS, API Gateway, CloudWatch, VPC, IAM), Docker, CI/CD, GitHub Actions
AI/LLM: Prompt Engineering, RAG systems, LangChain, OpenAI API (Chat + Embeddings), ChromaDB, FAISS, Semantic search, Hybrid search, Re-ranking, RAGAS evaluation
Security: JWT Authentication, SHA-256 Hashing, Role-Based Access Control (RBAC)
Tools: Git, GitHub, Linux

NON-TECHNICAL SKILLS

Problem-Solving, Team Collaboration, Communication, Self-Learning, Adaptability

LANGUAGES

English, Hindi, Marathi, Konkani

WORK EXPERIENCE

Python Developer Intern Automation & Backend Development <i>AI Adventures LLP</i>	Dec 2024 – Feb 2025 <i>Pune, Maharashtra</i>
- Eliminated manual attendance tracking by building an end-to-end Absence Detection System (Python + Google Sheets API + GitHub Actions), reducing reporting time by approximately 80% and human error to zero. - Built a real-time Google Sheets monitoring pipeline that automated data reconciliation across internal workflows, replacing a manual, error-prone process. - Redesigned 3 Python course modules and created 10+ interactive quizzes on Moodle LMS, improving learner engagement.	

PROJECTS

HoneyCloud – Smart Scalable Honeypot Platform	Final Year Project
- Designed a cloud-deployed honeypot platform using Python with real-time threat dashboards, scalable multi-node architecture, and attacker behavior analytics. - Implemented a REST API-based analytics layer to surface actionable threat intelligence and support attacker profiling across distributed nodes.	
Semantic Plagiarism Detector	Github
- Developed an AI-powered plagiarism detection system using Sentence Transformers and FAISS to identify paraphrased and semantically similar content beyond keyword matching. - Built a multi-level similarity pipeline with document and paragraph-level embedding analysis, along with a Streamlit dashboard featuring similarity heatmaps and interactive pairwise analysis.	
SVF – Secure Virtual File System	Github
- Engineered a persistent virtual file system in C++17 with Argon2id security, B-Tree directory indexing, and a thread-safe concurrency model (Readers-Writer lock). - Designed a cross-platform block storage engine mimicking ext4, supporting POSIX permissions and modular user management across Windows, Linux, and Docker.	

CERTIFICATIONS

- Google AI Essentials — Google, Feb 2025 (Credential: VM5936N7UHK7)
- Google Prompting Essentials — Google, Jan 2025 (Credential: E5DFX424OVYK)
- Python for ML Training — EduPyramids, SINE, IIT Bombay, Apr 2026 (Certificate ID: 3809497GNS, Score: 96%)
